

DBHD 2.0.0 Building Site Plan - Biosphere Buildings + Shaft - by Ing. Goebel

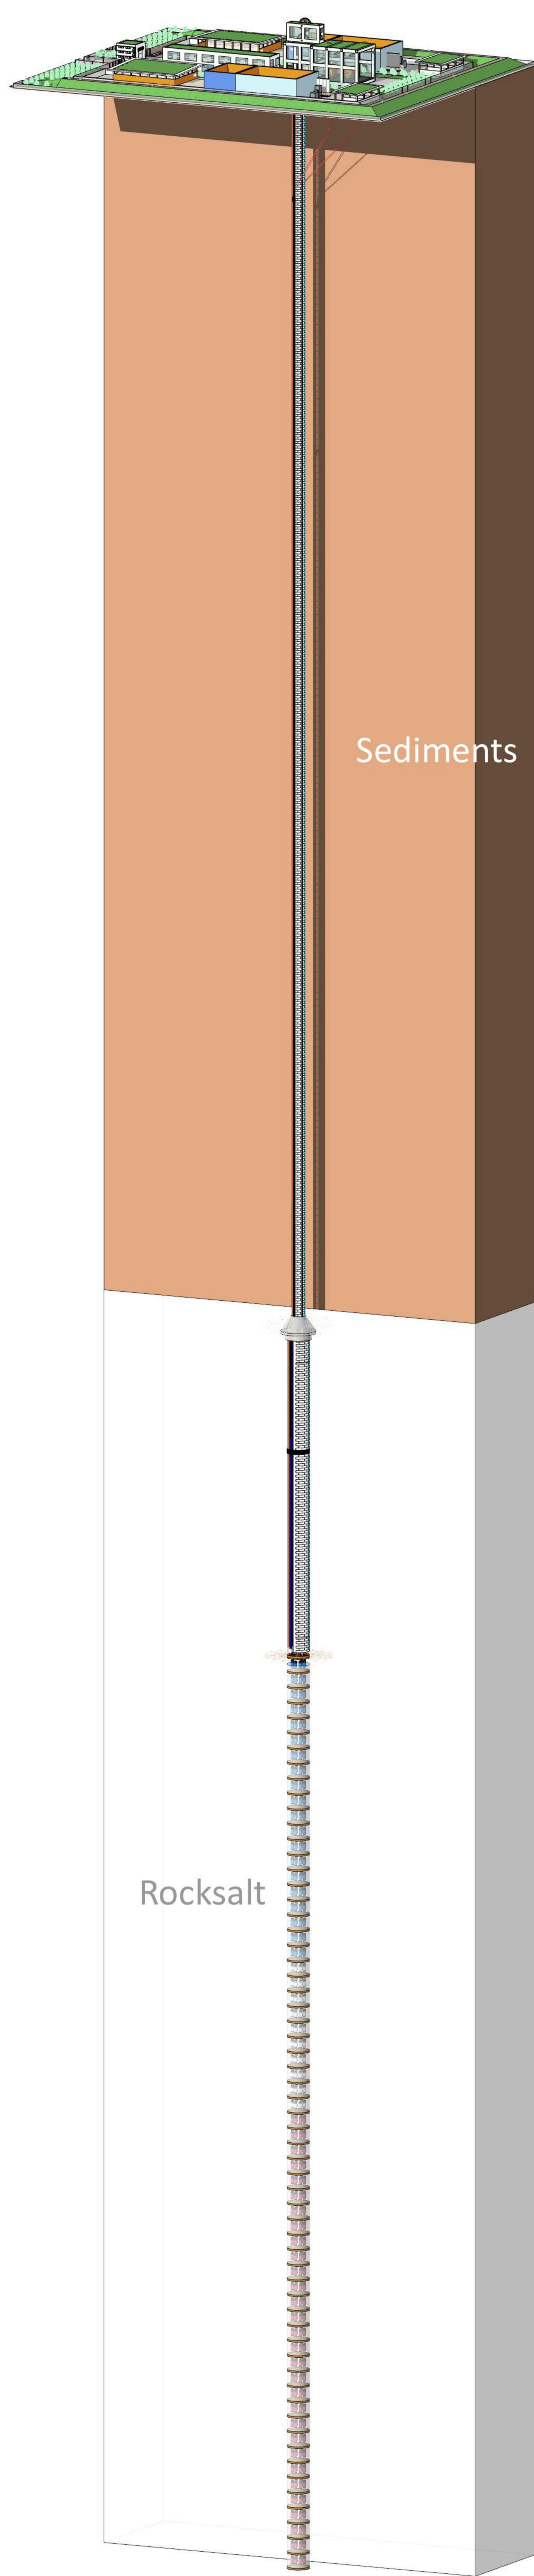

best viewed in Acrobat Reader - zoom in and find out - GDF = Geological Disposal Facility aka. "Endlager"
this plan shows how to build a "deep, dry and gas-tight closed" nuclear repository in rocksalt or clayrock.

DBHD 2.0.0 - Closed GDF Plan - for Clayrock and Rocksalt - by Ing. Goebel

best Bitumen for "instant" gas-tight closing in clayrock. Put a distance between hot waste and the bitumen
Rocksalt (dry) for gas-tight with mountain pressure ! - takes 80-120 years - that is a very solid closure !!
